Work Experience

Globant(2019-2021). Participated in SAP S/4 implementation.

Frisco (September 2019-November 2021). I was the person in charge of account receivable module implementing on SAP. Made functional specification for electronic payment, electronic invoice and reports on SAC, customizing related to electronic invoicing and edocument, make unit testing and integration testing, make the documentation for key users and internal consulting team, part of the documentation was done using SAP enable now. Finally, offer training to 15 business users and incident solving post go live.

Grupo ASSA(2013-2019). Participated in some projects as consultant for different SAP modules, focusing on FI module.

- HAL Aluminium Project (February 2017- September 2019). AMS Project, supporting key users in punctual doubts about MM, SD, PP and FI. Taking part into integral and integration testing, training users and defining the initial request. Communicating between Japan and Mexico team in order to complete the requests.
- Grupo Modelo Project (February 2015- December 2016). Project in which we supported Grupo Modelo Activities together with AMS offshore team in India. My main activities consist of tracking and monitoring settlement process, translation and support to FI team. Taken part in some rollouts, where the objective was downloading and charging data in LSMW. 2 new transactions were developed for clearing items automatically. One add on transaction looked for information on BSIK table and used FB1D to clear the items, while the other transaction looked in BSID and used f-44. Before the clearing, the program must look for specific information in the open items.
- Chocolates Turin Project (November - February). Project in which I gave support as Jr PMO for a SAP 6.0 Implementation. The main activities were administrative activities like: PPT's creation, Document administration, Time line Project creation with Microsoft Project.
- Maxcom Project (August 2013- November 2013). Project in which I gave support as SAP FI jr. Consultant. The objective of the Project was a SAP system upgrade from 4.6 to 6 ECC. The main activities were: unit and integral testing, documentation and incident solving.
- Zurich Project (May 2013 –August 2013). International Project in which I gave support as BPC SAP consultant. The main activity of this project was the implementation of the module. The activities were: script building, BPF administration, Input sheets creation and documentation.

Servicios Encino Azul S.A de C.V. (January- August 2013). I have completed 2 projects as SAP WPB Junior Consultant:

- SAP WPB Grupo Merza training(June). The SAP WPB and manager training was delivered to key users of the Enterprise.

- SAP WPB-KOF Project (January-April). Project in collaboration with KOF in which I elaborated the material for training and handbooks using SAP WPB. We trained the key users in SAP WPB.

Undergraduate Experience

SAP FI Academy (2012). SAP FI Academy.

SAP SD Academy (2011). SAP SD Academy.

Entrepreneur Project in collaboration with BYU Television International (2011). Project in collaboration with BYU channel. The Project was about Earning as much money as possible in five hours, but the sources that you had at the beginning were limited. My team was the winner at the end of the match.
